

SUMMARY

Final-year Computer Science student with hands-on experience in web development, machine learning, and database management. Skilled in building dynamic web applications, developing ML models for NLP tasks, and creating robust software solutions using C++ and Python.

EXPERIENCE

Online Paper Submission Portal

PHP, HTML, CSS, SQL

- Built a web-based platform for academic paper submission and review, enabling seamless interaction between authors and administrators.
- Designed and normalized database schema to manage user accounts, submissions, and review workflows.
- Implemented user authentication, file upload capabilities, and administrative dashboards for paper approvals.
- Enhanced user experience with a clean UI and role-based access control.

Tic Tac Toe Game

C++

- Created an interactive console-based Tic Tac Toe game supporting single-player and two-player modes.
- Utilized Object-Oriented Programming (OOP) to design reusable game logic and improve code readability.
- Focused on efficient algorithms for win detection and draw conditions to ensure flawless gameplay.

Bank Management System

PHP, HTML, CSS, SQL

- Designed and developed a dynamic web application to manage banking operations including account creation, deposits, withdrawals, fund transfers, and balance inquiries.
- Created responsive user interfaces using HTML, CSS, and PHP for both customer and admin panels.
- Implemented a relational database (MySQL) to manage customer records, transaction histories, and account details.

Fake News Detection System

Python, scikit-learn, Logistic Regression, Decision Tree, Random Forest

- Designed and implemented a machine learning model to classify news articles as fake or real using NLP techniques.
- Preprocessed datasets with text cleaning, tokenization, and TF-IDF vectorization to enhance feature quality.
- Trained and compared Logistic Regression, Decision Tree, and Random Forest classifiers; achieved ~90% accuracy on test data.
- Visualized performance metrics (confusion matrix, ROC curves) to evaluate and optimize model performance.

EDUCATION

Bachelor of Science (BS) in Computer Science

09/2022 - Present

COMSATS University Islamabad, Vehari Campus

- Pursuing a 4-year degree in Computer Science with a strong focus on Software Development, Machine Learning, and Web Technologies.
- Completed coursework in Data Structures & Algorithms, Database Systems, Artificial Intelligence, Object-Oriented

CERTIFICATES

- Anti-Tobacco Awareness Drive**
COMSATS Univeristy Islamabad Vehari Campus
Contributed to a university-wide social awareness initiative aimed at promoting public health and community engagement.
- Visio Spark Gaming Competition**
COMSATS Univeristy Islamabad Wah Campus
Actively participated and demonstrated teamwork and strategic thinking in the Visio Spark inter-university gaming event.
- GAPS (Gaming and Programming Society)**
COMSATS Univeristy Islamabad Vehari Campus
Awarded for securing 2nd position in a competitive SQL database query challenge.

SKILLS

Git, VS Code, Jupyter Notebook	HTML, CSS,MySQL	Intermediate
	ML & NLP	Intermediate
Database Management	C++, Python, SQL	Intermediate

LANGUAGES

Urdu	Native	English	Intermediate
